We make it *possible*

FOOD & BEVERAGE PROCESSING INDUSTRY
SHAFT SEALS

SHAFT SEALS FOR PROCESSING INDUSTRY

In a challenging environmental and sanitary context, the food and beverage industry needs reliable partners.

Hutchinson provides standard and tailor-made sealing solutions fully adapted to shafts on rotating machines used for the processing industry.

Our know-how in sealing solutions and our fully integrated manufacturing process ensure a high level of service.

From the compounds formulation to production of seals in small or large series, we manufacture the complete value chain. The origin of products is guaranteed.

EXPERT IN DYNAMIC SEALING

For safety and health, our experts provide support for selecting the most suitable shaft seal solution.

They take into consideration customers application and requirements to provide the most efficient and reliable shaft seal even under extreme application conditions.

Our team also brings technical assistance during the assembly process to optimize the seals' lifetime.

We make it **possible**

- ▶ Food & beverage approved materials : EPDM - NBR
- ▶ Mild or stainless steel inserts
- ▶ Customized design
- ▶ In-house development and production of rubber materials
- ▶ Certificate of origin
- ▶ Made in France
