

HUTCHINSON®

We make it *possible*

INDUSTRIAL RUBBER  
SHEETS  
COMPACT RUBBER

As rubber experts since 1853, Hutchinson Foam & Converting Division (FCD) designs and manufactures a complete range of compact rubber sheets.

From the development of materials in our research and innovation center to the production of our entire range of sheets in our factory in Chalette-sur-Loing (FRANCE), the process is totally integrated, guaranteeing the highest quality.

Our expertise and know-how allow us to design custom-made foils, perfectly meeting the needs of our customers, and ensuring safety and comfort for diverse use in:

- ▶ Aerospace
- ▶ Automotive
- ▶ Construction and public works
- ▶ Railway
- ▶ Tiling
- ▶ Chemicals
- ▶ Food industry
- ▶ Drinking water (contact on large surfaces)

## DEVELOPMENT OF CUSTOM-MADE SHEETS

Thanks to our expertise and our mastery of the process, we can propose compact rubber sheets in all compounds, thicknesses, sizes and shapes in order to adapt completely to the need.

Materials : CR, EPDM, IIR (Butyl), NBR, NR ...

### ▶ Dimensions

- Thickness from 0.3 to 14 mm
- Width from 30 to 1950 mm

### ▶ Shapes

The sheets can be delivered in semi-finished form as strips or rolls, vulcanized or not. We can cut to all shapes and customer constraints or specifications.

### ▶ Customization

- Multi-material lamination (rubber + PTFE, rubber + rubber ...)
- Sheets can be ground from 3mm, as close as possible to the desired nominal size
- Addition of textile inserts (polyamide, polyester)
- Different types of aspect (fabric or smooth)
- With or without talc

## OUR STRENGTHS

- ▶ 100 years of experience in the manufacture of compact rubber
- ▶ Material development and customization of sheets
- ▶ Complete control of the manufacturing process: from mixing to the finished product
- ▶ Certified plants : ISO 9001, ISO 14001, IATF 16949
